Dr Richard Jones is currently Professor of Clinical Biomechanics and Director of the Salford Gait Laboratory at the University of Salford.

He currently leads the Knee Biomechanics and Injury Research Programme in the School of Health Sciences investigating the typical and abnormal function and treatment of the knee joint.

Dr Jones has vast experience of biomechanical movement analysis in a wide range of neurological and orthopaedic conditions but his research focuses primarily on lower limb osteoarthritis, anterior cruciate ligament injury prevention and rehabilitation and conservative management of knee injuries.

He has published over 40 papers in peer-reviewed journals and is a honorary senior lecturer at the University of Manchester. He is also a co-applicant on a £2 million programme grant from Arthritis Research UK aiming to develop an understanding of conservative treatments in knee osteoarthritis.
