

Kiran Khokhar
PhD student
University of Leeds

Kiran Khokhar graduated from the medical school of King's College, London in 2010, with an intercalated BSc Hons degree in Neuroscience from the same institution. She completed the initial years of her medical training, and obtained Membership of the Royal College of Physicians (MRCP), working as a full time junior doctor in the Yorkshire and Humber area. She started working as a specialist registrar in the field of Rheumatology in 2015.

She began a PhD at the University of Leeds in 2017 and is based at the Leeds Institute of Rheumatic and Musculoskeletal Medicine, a EULAR Centre of Excellence. Her PhD research focuses on hip osteoarthritis, how modern 3D imaging can provide new insights into disorders of the hip and the resulting implications for future therapies.
